ABOUT ME

Hi! My interest in IT started as a hobby, but so admired me that nown I have got a three-year experience of professional work as a system administrator. Nowadays, I know that most of all I like to solve complex problems. Not all have a brave to tackle such ones. Surely, I try to achieve the goals. I have extensive experience in the field of IT outsourcing organizations of different magnitude.

I've configured more than 30 servers at the bases of Windows Server 2003/08/12, more than 20 virtual machines optimized, more than 50 databases and Websites on servers IIS and Apache, and more than 30 organizations have been automated through my experience.

I am versed in choosing equipment, starting from trade equipment and finishing of choosing servers equipment. I offer services for setting and administration such as:
Windows Server 2008/2012 Ubuntu

-MS Terminal Server
-MS SQL Server, My SQL, Postgres
-Mikrotik
-VmWare, Proxmox
-Microsoft Echange
-VPN, Firewall
-Protection your company's network
-Setting Backup systems and data
-1C

I'm very motivated to work on brilliant and interesting projects.
